G.P VARSHA

9606327991 | gpvarsha0930@gmail.com | Bangalore | linkedin.com/

PROFESSIONAL SUMMARY

Quality-focused Full Stack Developer with a Bachelor's in Information Science and hands-on expertise in **Python (Django)** and **React.js**. Successfully bridges the gap between software development and reliability by leveraging a **9-month professional certification in Software Testing** and enterprise-level troubleshooting experience at **Accenture**. Proven track record in building secure, decoupled architectures, including **RBAC** and **REST APIs**, with a strong focus on reducing application crash rates and optimizing system performance. A disciplined problem-solver committed to delivering clean, maintainable code within **Agile (SDLC)** environments.

TECHNICAL SKILLS

Backend: Python, Fast API, Django
Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap
Databases & QA: MySQL, PostgreSQL, SQLite, Advanced SQL (Joins, Subqueries, Indexing), Manual Testing (Functional, Regression, Smoke), SDLC/STLC.
Tools: Git, GitHub, VS Code, Postman
Concepts: REST APIs, MVC Architecture, Authentication Basics, CRUD Operations

PROFESSIONAL EXPERIENCE

FULL STACK DEVELOPER| NMIT Solutions Pvt Ltd| Bangalore **July 2025 - Feb 2026**

- Designed and developed a full-stack Appointment Booking Application used by 100+ test users, automating appointment scheduling and reducing manual booking conflicts by 60%.
- Built 12+ RESTful APIs using Django and Python for user authentication, appointment management, and admin controls, enabling seamless frontend-backend integration.
- Developed 15+ reusable and responsive UI components using React and implemented Redux for centralized state management, reducing unnecessary component re-renders by 35%.
- Implemented secure role-based authentication (Admin/User) and protected routes, improving data security and preventing unauthorized access.
- Debugged and resolved 20+ frontend and backend issues during testing, decreasing application crash rate by 40% and improving overall user experience.
- Collaborated with a 4-member development team in an Agile sprint cycle, delivering 95% of assigned features within deadlines.
- Integrated form validation and error handling mechanisms, reducing invalid booking submissions

SERVICE DESK MANAGEMENT| Primus Global (Accenture)| Bangalore **Feb 2024 - Jan 2025**

- **Root Cause Analysis:** Performed deep-dive technical troubleshooting for enterprise system failures, improving resolution speed by 30% through effective log analysis.
- **System Infrastructure:** Managed user access and security protocols within a large-scale enterprise environment, gaining expertise in **Network Security** and **Access Management**.
- **Process Improvement:** Collaborated with the engineering pod to document recurring application-side bugs, facilitating faster patch deployments for the development team.

APPOINTMENT BOOKING APPLICATION (FULL STACK – REACT, REDUX, PYTHON, DJANGO)

Project #1 (July2025 – Feb 2026)

Project: Appointment Booking Application

Client: Internal Product Development – NMIT Solution
• **Role:** Full Stack Developer (React & Django)

Description:
Developed a full-stack web-based Appointment Booking Application designed to streamline scheduling, reduce manual conflicts, and improve appointment management efficiency. The system enables users to book, update, cancel, and track appointments through secure and responsive workflows.

GitHub: https://github.com/gpvarsha7747-ctrl/salon-management-system

Roles and Responsibilities:

- **Architecture:** Developed a decoupled Full Stack system using **React.js** and **Django REST Framework**, implementing a modular "Apps" structure for scalability.
- **Background Tasks:** Integrated **Celery and Redis** to handle asynchronous background processes, including automated email notifications and appointment reminders.
- **Security:** Implemented **JWT (SimpleJWT)** for stateless authentication and **Role-Based Access Control (RBAC)** to secure Admin vs. User endpoints.
- **Database:** Structured complex relationships for multi-category services (Male/Female) and subcategories using **Django ORM** with **SQLite** for development.

EDUCATION

Bachelor of Technology | information science and technology| Presidency University, Bangalore, 2018 - 2022

Central Board of Secondary Education | class- x| Kendriya Vidyalaya RWF, Bengaluru, Karnataka 2014 - 2015

CERTIFICATIONS

• Introduction to Python – Data Camp | September 2021
• Intermediate Python – Data Camp | October 2021
• Certified Software Quality Engineer | QSpiders | 2023
• React JS Course – Udemy | 2025
